

Children in Medical Research: Access Versus Protection

Filesize: 2.32 MB

Reviews

Simply no terms to explain. I am quite late in start reading this one, but better then never. Its been written in an remarkably easy way and is particularly merely soon after i finished reading this book where basically changed me, affect the way i really believe.
(Prof. Jedediah Kuhic DVM)

Oxford University Press. Paperback. Book Condition: new. BRAND NEW PRINT ON DEMAND., Children in Medical Research: Access Versus Protection, Lainie Friedman Ross, Lainie Ross presents a rigorous critical investigation of the development of policy governing the involvement of children in medical research. She examines the shift in focus from protection of medical research subjects, enshrined in post-World War II legislation, to the current era in which access is assuming greater precedence. Infamous studies such as Willowbrook (where mentally retarded children were infected with hepatitis) are evidence that before the policy shift protection was not always adequate, even for the most vulnerable groups. Additional safeguards for children were first implemented in many countries in the 1970s and 1980s; more recent policies and guidelines are trying to promote greater participation. Ross considers whether the safeguards work, whether they are fair, and how they apply in actual research practice. She goes on to offer specific recommendations to modify current policies and guidelines. Ross examines the regulatory structures (e.g. federal regulations and institutional review boards), the ad hoc policies (e.g. payment in pediatric research and the role of schools as research venues), the actual practices of researchers (e.g. the race/ethnicity of enrolled research subjects or the decision to enroll newborns) as well as the decision-making process (both parental permission and the child's assent), in order to provide a broad critique. Some of her recommendations will break down current barriers to the enrolment of children (e.g. permitting the payment of child research subjects; allowing healthy children to be exposed to research that entails more than minimal risk without requiring recourse to 407 panels); whereas other recommendations may create new restrictions (e.g., the need for greater protection for research performed in schools; restrictions on what research should be done in the newborn nursery). The goal is...
