Place Matters: Geospatial Tools for Marine Science, Conservation, and Management in the Pacific Northwest (Paperback)

By -

Oregon State University Press, Canada, 2005. Paperback. Condition: New. Language: English . This book usually ship within 10-15 business days and we will endeavor to dispatch orders quicker than this where possible. Brand New Book. Although the ocean provides living space for about 97 percent of life on Earth, less than 5 percent of the ocean below the surface has actually been seen, let alone explored. Now, using the geographic information system (GIS), marine scientists are gaining new insights into a once-mysterious world. A technologically sophisticated database, information-management, and display system, GIS holds tremendous potential for mapping, interpreting, and managing ocean environments-- from the seafloor to the seafloor to the shoreline. Place Matters explores how marine GIS is contributing to the understanding, management, and conservation of the shores and ocean of the Pacific Northwest, which is becoming a hotbed of marine GIS development and applications as scientists expand the use of this cutting-edge technology to a variety of ocean science, policy, and management issues. Using these geospatial databases and tools, scientists, resource managers, and conservationists-- often in collaboration-- are making advances in the way that data are collected, documented, used, shared, and saved. The contributors to Place Matters show how...
