NORTH AMERICAN PARASITIC COPEPODS BELONGING TO THE LERNAEPODIDAE: WITH A REVISION OF THE ENTIRE FAMILY (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, United States, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from North American Parasitic Copepods Belonging to the Lernaepodidae: With a Revision of the Entire Family States Bureau of Fisheries. For these excellent advantages the author is indebted to the courtesy of the Hon. George M. Bowers, former United States Commissioner of Fisheries. The internal anatomy has been derived partly from the study of living specimens at each of the above localities, and partly from serial sections made in the laboratory of Johns Hopkins University, as noted in the ninth paper above mentioned. A number of specimens, including several of the new species, were collected by Dr. Edwin Linton during his investigations on the cestode and trematode parasites of fishes, and were generously turned over by him to the present author. These specimens are always excellently preserved and have proved of great value in the present study. Several years ago Dr. R. R. Gurley, at that time in the employ of the United States Bureau of Fisheries, collected in manuscript form all the available data regarding copepods parasitic upon our North American freshwater fishes. These notes have been-placed at the author s disposal, and as they included complete translations of everything written on North American species by foreign authors they have proved extremely valuable. Acknowledgment is made in the text whenever these notes have been incorporated. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books.
