THE BIOLOGY OF POULTRY KEEPING (CLASSIC REPRINT) (PAPERBACK)

Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from The Biology of Poultry Keeping If these five things are realized in a poultry house the birds will thrive and be productive in it, provided they are well and regularly fed and watered. It makes no difference particularly to the well - being of the birds how these necessary specifications of their dwelling are attained. To the poultryman, however. It is important that they be attained at the smallest expense, having regard to (a) initial cost. (b) repairs and up - keep and (c) labor necessary to operate the house to get the specified results The housing problem is to the poultryman, then. Both a biological and an economic one. The biological solution is definite. The requisites named above must be met, and there is one additional factor to be taken into account: namely size of house. Experiments made at various times and places indicate clearly that in northern climates, where birds must be shut up in the house during a part, of the Year in order to give best results. There should be allowed in the house at least three square feet of floor space per bird and preferably a little more. Four square feet of floor space per bird is a liberal allowance. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work.
