Forgotten Books, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Excerpt from A Study of Concrete Mixers: Thesis In 1850 Frederick Ransome built the first mixer for use in the manufacture of Ransome stone, the fore-runner of the concrete of the present day. This machine was a crude affair consisting of a stationary cylinder within which was rotated a shaft carrying two rows of cross-arms. The next machine consisted of a shallow pan in which two vertical wheels were driven. These wheels turned on their own axles and also traveled in a circle around the center of the pan. This machine mixed a fine wet mixture very well but was adapted to no others. With the introduction of Portland cement and larger aggregate, came the demand for a mixer designed for heavy duty. The next type was a long inclined hexagonal drum. There was no mechanism about this type nor were there any deflectors. The operation of mixing depended solely upon rolling contact. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy. In rare cases, an imperfection in the original, such as a blemish or missing page, may be replicated in our edition. We do, however, repair the vast majority of imperfections successfully; any imperfections that remain are intentionally left to preserve the state of such historical works.
