Createspace Independent Publishing Platform, 2017. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****.What a wonderful world we could have because the human potential seeks greatness, as our wonderful minds and bodies possess the innate ability to progress. As a species of intelligent beings, we know what we must do to insure our survival on this small planet. We possess the technology to improve the living conditions of every person on earth, while cleaning up and protecting our natural environment. We possess the natural resources, if appropriately distributed to insure every human being will have adequate food, shelter and medical care throughout their lifetimes. We possess the ability to create meaningful employment that permits individuals to develop self-respect and sustainable lives. A new economic paradigm that recognizes abundance must envelop the world order to eliminate the seemingly perpetual zero-sum game system. We need not look too far to discover that life, our earth, and our universe are filled with limitless abundance! Certainly, there exist sufficient natural resources to support a reasonable human population of less than ten billion people, if resources are properly exploited and distributed. Management and distribution of world resources should eliminate waste, conserve the ecosystem, and intelligently use natural resources through technological enhancements to solve even the most persistent and perplexing human problems. The rich, who can provide capital and skills to optimize world resources, can become richer, as poverty is eliminated and a growing global middle-class becomes the consumers of production that is owned by the wealthy elites. It s a win-win paradigm that can be utilized to improve our environment and to save our world for our future generations of all sentient life on planet Earth.
