A number of books have been written relating to congenital heart disease, but generally, they reflect individualised medical management of local practice and philosophies. Although this book assumes a prior working knowledge of congenital heart disease, it aims to provide the reader with a reference guide to be utilised at the bedside. This book is primarily written for nursing staff focusing on a multidisciplinary team approach to managing children. It is also a valuable tool for community staff, dieticians, doctors, neonatal staff, perfusionists, pharmacists, physiological measurement technicians, physiotherapists, psychologists, social workers, theatre staff, and other personnel who come into contact with this group of children.
