SOURCE: U. S. Department of Education, National Center for Education Statistics, Third International Mathematics and Science Study ( TIMSS ), Video Study, 1999 Differences in Student Actions Among the major activity types examined in this study, independent practical activities ( observing and manipulating objects ), independent seatwork activities ( reading, writing, and small group discussions ), and whole-class discussions engage students most actively in doing science work. Independent practical activities: Across-country differences, described and presented previously in figure 2, indicated that Australian and Japanese science lessons focused more time on independent practical activities than did Czech and Dutch lessons. Independent seatwork activities: Dutch lessons focused more time on independent seatwork activities compared to Czech and Japanese lessons ( figure 2 ). Whole-class discussions: Whole-class discussions accounted for 10 to 33 percent of...
