

Our Fluid Universe A unified theory of physics that physically describes photons, matter, gravity, electromagnetic forces, the strong and weak forces, quantum theory, and much more.

Filesize: 4.43 MB

### ***Reviews***

*This publication is indeed gripping and interesting. It is rally exciting throgh reading period of time. I am just happy to inform you that this is the very best publication i actually have go through during my individual existence and could be he finest pdf for ever.*

***(Miss Lela VonRueden)***

## OUR FLUID UNIVERSE A UNIFIED THEORY OF PHYSICS THAT PHYSICALLY DESCRIBES PHOTONS, MATTER, GRAVITY, ELECTROMAGNETIC FORCES, THE STRONG AND WEAK FORCES, QUANTUM THEORY, AND MUCH MORE.

CreateSpace Independent Publishing Platform. Paperback. Condition: New. This item is printed on demand. 50 pages. Dimensions: 8.0in. x 5.0in. x 0.1in. This book describes a surprisingly simple paradigm change in physics that makes it physically understandable, solves its many mysteries, and unifies all aspects under a single new principle. The three basic fields in physics are now physically understandable, the three particles that make all atoms can now be physically described, and the four basic forces in the universe are now physically understandable. This new physics-based theory challenges a century of math-based modern physics by physically explaining physics, an achievement that leading physicists consider impossible. Dr. Lang started this new theory in 1950 at age 21, two years after graduating from Caltech in mechanical engineering. His goal was to physically understand physics. It took him five decades to develop this new theory, and another decade to transform it into papers and books. This radically new theory results from filling all space with spatial fluid; this fluid follows normal fluid theory, except it has no viscosity and therefore cannot form boundary layers. By intuitively introducing many new concepts, this new theory converts physics into a physically understandable science where energy and matter become surprisingly similar. To make these improvements, it was necessary to reverse all of the assumptions made by Albert Einstein, and to ignore those of his findings that conflict with daily experience. As a consequence, space is no longer empty; the speed of light is not constant; space and time cannot warp together; and mass, length, and time cannot change with speed. This new theory physically explains how and why gravitational, electromagnetic, and quantum phenomena act as they do. A new pulsing concept provides all photons and particles of matter with their frequency, mass, gravity, and quantum properties. This theory...
