

Seven : Numbers Through the Looking Glass (Paperback)

Filesize: 1.94 MB

Reviews

I just started reading this article ebook. It really is written in easy phrases and not difficult to understand. I am just very happy to tell you that here is the very best pdf we have read during my individual life and might be the very best ebook for actually.

Createspace Independent Publishing Platform, United States, 2010. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Here s the deal! Whether I m the luckiest numerologist in the whole world or this is about the Theory of Everything. . I give until you re done reading the last chapter but you better have an answer by then because if not you better pick up a pencil and a piece of paper and start rewriting Physics and Mathematics from scratch! I mean it! Numerologists have been around forever. Albert Einstein was one of them; he always believed that numbers had a particular way to communicate with us. I think I found the language and they told me their secrets. This book is a living proof of that.
