The Chemistry of Soil Analysis

By Donald A. Storer

Terrific Science Press. Paperback. Condition: New. 58 pages. Dimensions: 10.7in. x 8.5in. x 0.2in. This book offers chemical laboratory technology students and employed technicians nine investigations covering the basics of soil analysis for agronomic purposes. Many of the procedures in this book reflect or are modified from actual industry procedures. The investigations include background information, material lists, step-by-step procedures, applicable calculations, and review questions. IMPORTANT NOTE: Instructors using this book to teach a class will benefit from the CD-ROM titled Instructor Notes for The Chemistry of Soil Analysis (ISBN 1-883822-39-4). The CD-ROM files include instructor information for each of the book's nine investigations, including the time required for the investigation, recommended group size, goal of the investigation, procedural tips and suggestions, sample results, and plausible answers to student questions. Text from the book is NOT included on the CD-ROM. This item ships from multiple locations. Your book may arrive from Roseburg, OR, La Vergne, TN. Print on Demand (Paperback).
