Createspace Independent Publishing Platform, United States, 2013. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. The conservation and protection of natural resources requires monitoring of temporal and spatial variability of ecosystem conditions, particularly with regard to human-induced stressors. The National Park Service (NPS) received a science mandate from Congress with the passing of the 1998 National Parks Omnibus Management Act and created the Inventory and Monitoring (IM) Program. A primary role of the IM Program is to collect, organize, and make available natural resource data and to contribute to the NPS s institutional knowledge by facilitating the transformation of data into information through analysis, synthesis, and modeling (NPS 2006a).
