Pro PerformancePoint Server 2007: Building Business Intelligence Solutions

By Philo Janus

Apress. Paperback. Condition: New. 472 pages. Pro PerformancePoint Server 2007 is Microsofts latest product in its line of business intelligence applications, a piece of software that gathers data from corporate databases and delivers it to an end user in a friendly, graphical fashion. PerformancePoint offers the next step in the digitization world. Businesses now have gigabytes upon terabytes of data in databases; theres a need to interpret the data and glean key business insights from it and PerformancePoint. Author Philo Janus walks you through the business process management and architecture of the PerformancePoint product before delving into developing a complete business intelligence solution, from start to finish. What youll learn Develop an end-to-end business intelligence solution. Harness and massage data using SQL Server Integration Services, SQL Server Analysis Services, and SQL Server Reporting Services. Use ProClarity Analytics to get a better view on corporate performance data. Build a portal with key performance indicators and business scorecards using PerformancePoint, Excel Services, and Microsoft Office SharePoint Server 2007. Build out a complete business scorecard. Develop tools for business planning and forecasting. Who is this book for If youre interested in harvesting data from your corporate databases, developing solutions to represent it visually...
