

## Louisiana Conservationist, Vol. 4: March 1952 (Classic Reprint) (Paperback)

Filesize: 4.78 MB

### **Reviews**

*It is an awesome pdf i have possibly go through. It really is filled with wisdom and knowledge You will not really feel monotony at whenever you want of your time (that's what catalogues are for relating to in the event you ask me).  
(Horace Schroeder)*

**LOUISIANA CONSERVATIONIST, VOL. 4: MARCH 1952 (CLASSIC REPRINT) (PAPERBACK)**

FBC LTD, 2017. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*. Excerpt from Louisiana Conservationist, Vol. 4: March 1952 If there are not enough grasses in the community, the soil loses its ability to take up and hold moisture: It may become eroded and lose its power to produce corn for hogs. If there are not enough earth worms, the same thing can happen. If there are not enough squirrels, there will be fewer acorns planted and in time there will be fewer oaks. If there are not enough cottontails - one of whose functions is to feed foxes - foxes may look to the farmer s poultry for food. On the other hand, if there are too few foxes to eat meadow mice, there may be so many meadow mice that there will be less alfalfa for dairy cows. If there are not enough songbirds, there may be too many destructive insects, resulting in a shortage of grain for beef cattle. But there must be useful insects to pollinate alfalfa, red clover, and sweetclover, else these legumes will not produce seed. Thus we see that a successful farm community must have an abundance of useful wildlife and a low number of harmful kinds. It must have what is called a favorable biologic balance. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important historical work. Forgotten Books uses state-of-the-art technology to digitally reconstruct the work, preserving the original format whilst repairing imperfections present in the aged copy.
