EFFECTS OF INTEGRATED USE OF ORGANIC INORGANIC FERTILIZERS ON TOMATO

[DOWNLOAD](#)

LAP Lambert Academic Publishing. Paperback. Condition: New. 124 pages. Dimensions: 9.0in. x 6.0in. x 0.3in. The prevailing higher prices of inorganic fertilizer along with low nutrient value and shortage of organic fertilizers like Farm Yard Manure (FYM) has become a main problem in managing soil fertility problems in Tigray. So, integrated use of organic and inorganic fertilizer help to overcome problems with the sole application. Based on this, a field experiment was conducted to study the effect of integrated use of FYM and Urea fertilizers on yield of irrigated tomato (*Lycopersicon esculentum* Mill), soil fertility improvements and socio-economic acceptability. FYM and Urea was integrated in different proportions to supply 60Kg/ha-1 of Nitrogen (N) from both sources at different ratios. 5 different combinations along with one control were used as treatments. The experiment was arranged in RCB Design with 4 replications. The results of the experiment showed that integrated use of FYM and Urea significantly increased the major soil chemical properties ($p < 0.05$), marketable yield (375.4Q/ha-1) and economic profit. The Perception of the respondent farmers also indicates that 44.4 use an integration of both nutrient sources for better tomato productivity. This item ships from multiple locations. Your book may arrive from Roseburg,OR, La Vergne,TN. Paperback.
