Anthrax: The Investigation of a Deadly Outbreak

By Jeanne Guillemin

University of California Press. Paperback. Condition: New. 339 pages. Dimensions: 8.9in. x 6.0in. x 0.9in. In April of 1979 the city of Sverdlovsk in Russias Ural Mountains was struck by a frightening anthrax epidemic. Official Soviet documents reported sixty-four human deaths resulting from the ingestion of tainted meat sold on the black market, but U. S. intelligence sources implied a different story, and the lack of documentation left unresolved questions. In her riveting investigation of the incident, Jeanne Guillemin unravels the mystery of what really happened during that tragic event in Sverdlovsk. Anthrax is a virulent and deadly bacteria whose spores can remain in soil for as long as seventy years, killing grazing animals and putting humans in jeopardy of eating infected meat. Contemporary concern is more centered on anthrax as an airborne biological weapon whose inhaled spores can result in ninety percent mortality for those infected. As part of a team of doctors and researchers, Jeanne Guillemin traveled to Russia in 1992 to determine the cause and extent of the epidemic. Her affecting narrative transforms a case of epidemiological investigation into a politically charged mystery. She creates a vivid sense of immediacy and drama with her insiders account of the...
