A man can learn to run a large engine about as easily as he can learn to run a small one. But a given percentage of waste in the large engine means a greater amount of money than in the small one. To keep costs at the lowest possible figure requires a great deal more than knowing how to run an engine and boiler. It demands an intimate knowledge of fundamental principles and their application which the engine runner of former times knew nothing about. The application of these principles in practice demands wide experience and a thorough technical training that no foreman or superintendent can hope to possess in addition to the demands made upon him along other lines. For...
