

## Computers & Biotechnology

By Rani, Kirti

Condition: New. Publisher/Verlag: LAP Lambert Academic Publishing | Introduction of computers application and its types & its role in Biotechnology as biocomputers | This book has 8 chapters which include the introduction and role of computers in biotechnology as computational biology and bioinformatics. Due to its role in biological sciences and biotechnology, new name is given to this application as biocomputers. This application of computers in biotechnology as computational biology and bioinformatics is the phenomenal and inevitable. This applied science is an excellent fusion of life sciences and computers. Hence, this application of computers is very helpful to solve some untold facts in biotechnology as in the field of forensic sciences, genetics, evolutionary biology, biochemistry, microbiology, etiopathogenesis of epidemics & genetic disorders, cell & molecular biology. I also express my profound sense of gratitude and sincere thanks to Mrs. Bhawna sharma (B.Sc. and M.C.A. [Master of Computer Application] from Maharshi Dayanand University, Rohtak, INDIA) for her encouragement and support during the writing of this book. She is also an inspiration for me to complete the project of this book. Last but not least, my indebted thanks to All Mighty and my loving parents, My Father, "Late Mr. Ram Kumar Sharma & my mother," Mrs. Sushila Sharma. | Format:...

### Reviews

*A really amazing ebook with lucid and perfect answers. It is really simplistic but excitement in the 50% in the publication. I am just happy to explain how this is actually the best pdf I actually have studied during my individual daily life and may be the greatest ebook for possibly.*

-- **Toney Bogan**

*This publication will never be effortless to begin on studying but extremely entertaining to learn. It is probably the most incredible publication I have gone through. I realized this ebook from my dad and he suggested this publication to learn.*
