

Advances in Databases: 19th British National Conference on Databases, Bncod 19, Sheffield, UK, July 17-19, 2002. Proceedings

By -

Springer. Paperback. Condition: New. 204 pages. Dimensions: 9.2in. x 6.1in. x 0.5in. The British National Conference on Databases (BNCOD) was established in 1980 as a forum for research into the theory and practice of databases. This aim remains highly relevant today as database technology must meet the challenges of global applications that need to access and analyse data stored in multiple heterogeneous, autonomous - formation sources on the Web. th This volume contains the proceedings of the 19 BNCOD, held at the University of Shefeld in July 2002. The conference theme this year is Exploring the roles of database technology within the global computing infrastructure. There are 10 fu- length papers, 9 poster papers, and two invited talks. As in previous BNCOD conf- ences, there are a significant number of papers from abroad, including authors from Brazil, France, Italy, The Netherlands, Spain, Sweden, and the USA.

Ourrstinvitedspeakeris Jiawei Han who is currently at the University of Illinois at Urbana-Champaign. Jiawei Han is a distinguished researcher in the area of data mining, and his invited talk addresses in particular data mining techniques for stream data. The motivation for this research is the vast amounts of data produced at high speed by many real-time systems, which for practical reasons cannot be stored on disk for...

Reviews

The ideal publication i at any time go through. It is actually rally fascinating throug reading through time. I am pleased to inform you that this is actually the greatest book i have got read through during my individual existence and might be he best book for at any time.

-- **Alexandre Cruickshank**

This written book is great. I am quite late in start reading this one, but better then never. You will not really feel monotony at at any moment of your time (that's what catalogues are for about when you check with me).
