Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Excerpt from Ophthalmic Neuro-Myology: A Study of the Normal and Abnormal Actions of the Ocular Muscles From the Brain Side of the Question It has long been the desire of the author to help make the ocular muscle problem easy of solution. With this object in view he undertook the study of the normal and abnormal actions of the ocular muscles, from the brain side of the question. The results of this labor are set forth in this book, which might be entitled The Muscle Study Made Easy; but the title chosen is Ophthalmic Neuro-Myology, the name implying the nature of the study. This book is intended as a companion volume to Ophthalmic Myology. In the light of this newer study, not a word need be changed, in the older treatise, concerning the detection and treatment of heterophoric conditions. The hypothesis on which Ophthalmic Neuro-Myology is founded, may be stated as follows: There are eight conjugate brain centers, in the cortex, by means of which the several versions are effected, and one conjugate center by which convergence is caused. These conjugate centers act alike on orthophoric and heterophoric eyes, and when there is only one eye. Each of these is connected with two muscles, and the work done by the center and its muscles, under the guidance of volition, is normal work. The conjugate centers have no causal relationship with the heterophoric conditions, nor have they any power for correcting them. There are twelve basal centers, each connected with only one muscle. About the Publisher Forgotten Books publishes hundreds of thousands of rare and classic books. Find more at This book is a reproduction of an important...
