SOCIAL SCIENCE AND FREEMASONRY (CLASSIC REPRINT)

Forgotten Books, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.Excerpt from Social Science and Freemasonry Antiquity believed that all the Laws of the Universe, comprising God, Man, and Nature, were identical and could be embodied into One great and general Law or Principle called The Absolute, which was symbolized by the point of a sharp instrument. Ancient philosophers based their investigations upon the method of analogy, which consisted in establishing points of resemblance, of identity, between two apparently opposed objects, and then drawing conclusions from a series of very ingenious deductions between the known and the unknown terms; the known term serving to draw the analogy. It was thus that the custom of using symbols was established in all the Schools of Philosophy, symbols being the known terms through which the unknown could be defined and proved. Freemasonry has strictly preserved this old system of imparting knowledge. It represents today ancient universities with their methods of analogy, or science of symbols; and, to illustrate the universality of that method, too generally ignored by Masons, and its innumerable applications, we will make use of it to expose in a very clear manner the system of government advocated by Freemasonry. All the known forms of government are but modifications of three great political systems: Theocracy, Autocracy, Democracy.
