A staff gage was nailed to a willow stump about 15 feet above the measuring section. The gage was read daily until October 16, 1905, and about once a week after that date. The greatest discharge during the flood of 1907 is estimated as 3,900 second-feet, March 19. The minimum weekly flow of 317 second-feet occurred December 8 to 14, 1905. No discharge measurements have been furnished since 1906. The following record of gage heights and discharge measurements was furnished by Viele, Blackwell Buck for the Great Western Power Co., which maintained the station from the date of its establishment. Discharge measurements of North Fork of Feather River above Prattville, Cal., in 1905-6....
