paperback. Condition: New. Ship out in 2 business day, And Fast shipping, Free Tracking number will be provided after the shipment. Pages Number: 330 Publisher: Machinery Industry Pub. Date :2008-09-01 version 1 the system is the use of modeling and simulation models to analyze, evaluate and optimize the system performance of the related technologies. Currently, system modeling and simulation technology has been in business site selection, plant layout, new product development, production scheduling, enterprise and supply chain management and other fields has been widely used. The book machinery manufacturing systems, logistics systems, as an object, analyzes the system and the definition of manufacturing systems, composition and characteristics, describes the system modeling and simulation concepts and principles, systematic exposition of the basic system modeling and simulation elements, commonly used methods and their application procedures, analysis of the system modeling and simulation of key technologies, a brief introduction of the mainstream system modeling and simulation software functions, characteristics and applications, and ProModel software as an example, the software elements and the use of steps. Both system modeling and simulation book basic principles, concepts and methods described, there are typical cases of construction and application, and provides a lot of modeling and simulation of application cases and exercises. Meanwhile, the book comes with the corresponding courseware. This book can be used as industrial engineering, mechanical engineering, systems engineering, management, engineering and other professional undergraduate and graduate courses related to materials, but also as engaged in the manufacturing system design, new product development, production planning and scheduling, logistics and other areas of facility planning technical and management personnel of the reference book. Contents: Preface Chapter 1 Introduction 1.1 System 1.2 system and manufacturing system modeling and simulation of the basic concepts of modeling and simulation of manufacturing systems 1.3 Basic concepts 1.4 System Modeling and...
