Createspace Independent Publishing Platform, 2016. Paperback. Condition: New. Language: English . Brand New Book ***** Print on Demand *****. Also in 2016, cancer patients are still given questionable chemotherapies, which are proven to have no effect at all in the case of most cancers. On the contrary, the risk of developing cancer is growing even more. Why are cancer patients treated with a healing method that triggers exactly this disease? Also, the healing rate has hardly risen in all recent years and decades. Is a cure possibly not wanted, because one can make with the present methods very good money? This book proves with numerous studies that cancer research is significantly wider than we are told in the mainstream media and school medicine. 54 medical procedures (among others, organic germanium, intravenous vitamin C, salvestrol, melatonin, to name but a few) have been shown to lead to healing in scientific studies and sometimes even case studies in humans. Mind you alone and without the help of chemotherapy or radiation! In addition, you will find out which diagnostic methods can be used to diagnose cancer side-by-side, even years in advance. The book is deliberately SHORT-TERMED to allow the cancer patient a FAST AID and a FAST overview of alternative healing methods without having to read long novels. Whether school medicine or not, after reading this book, you can decide for yourself. However, only a fully INFORMED patient can make wise decisions. Do not let this freedom take you! If you are skeptical and think If it all looked so great, but everyone would know about it, then you will surely convince the numerous scientific studies and case reports in this book. Be open to alternative medicine and read this book impartially. After all, it is about YOUR life and YOUR health! A...
