

Circumstellar Matter

By Appenzeller, Immo / Jordan, C.

Book Condition: New. Publisher/Verlag: Springer Netherlands | Proceedings of the 122nd Symposium of the International Astronomical Union Held in Heidelberg, F.R.G., June 23-27, 1986 | Proceedings of the 122nd Symposium of the International Astronomical Union, Heidelberg, Germany, June 23-27, 1986 | The objective of this meeting was to bring together colleagues from different branches of observational astronomy and theoretical astrophysics to discuss and analyse the rapid progress in our knowledge and understanding of the matter surrounding stars, streaming off stellar surfaces, or falling onto stars. The meeting was sponsored by IAU Commissions 36 (Theory of Stellar Atmospheres), 29 (Stellar Spectra), and 34 (Interstellar Matter). There were two special reasons for organizing this meeting at Heidelberg in 1986: During this year the University of Heidelberg celebrated its 600th anniversary and the IAU symposium joined the many scientific events accompanying this celebration. Secondly, the year 1986 also marked the conclusion of a special cooperative research project ("Sonderforschungsbereich") in astrophysics at Heidelberg, a major part of which had been devoted to the physics of circumstellar matter. The main topics discussed at this meeting were: (1) circumstellar matter, bipolar flows, and jets from young stars and protostars; (2) circumstellar...

Reviews

It is one of the best books. Better than never, though I am quite late in starting to read this one. You won't feel monotony at any moment of the time (that's what catalogues are for regarding the event you check with me).

-- **Dr. Kristin Dickens**

This written ebook is excellent. It is amongst the most awesome ebooks I have studied. You will not truly feel monotony at any moment of the time (that's what catalogues are for regarding if you ask me).
