A FORWARD-BACKWARD SDES APPROACH TO PRICING IN CARBON MARKETS (MATHEMATICS OF PLANET EARTH)

Springer. Paperback. Condition: New. In this Brief, the authors consider a mathematical model for the pricing of emissions permits. The model has particular applicability to the European Union Emissions Trading System (EU ETS) but could also be used to consider the modeling of other cap-and-trade schemes. As a response to the risk of Climate Change, carbon markets are currently being implemented in regions worldwide and already represent more than 30 billion. However, scientific, and particularly mathematical, studies of these carbon...

Reviews

The publication is great and fantastic. I actually have read through and i am sure that i am going to planning to go through yet again yet again down the road. I realized this pdf from my dad and i encouraged this publication to understand.

-- **Jamarcus Runolfsson**

The ideal publication i ever read through. It is writer in simple words and never hard to understand. Your daily life span is going to be convert once you full looking over this ebook.

-- **Tanner Willms PhD**

Thorough information for pdf fans. It really is rally interesting throug looking at time. I am easily will get a satisfaction of studying a published pdf.
