Random House USA Inc, United States, 2011. Paperback. Book Condition: New. Updated, Revised ed.. 203 x 130 mm. Language: English . Brand New Book. Many people who have ever owned a pet will swear that their dog or cat or other animal has exhibited some kind of behavior they just can't explain. How does a dog know when its owner is returning home at an unexpected time? How do cats know when it is time to go to the vet, even before the cat carrier comes out? How do horses find their way back to the stable over completely unfamiliar terrain? And how can some pets predict that their owners are about to have an epileptic fit? These intriguing questions about animal behavior convinced world-renowned biologist Rupert Sheldrake that the very animals who are closest to us have much to teach us about biology, nature, and consciousness. Filled with captivating stories and thought-provoking analysis, *Dogs That Know When Their Owners Are Coming Home* is a groundbreaking exploration of animal behavior that will profoundly change the way we think about animals, and ourselves. After five years of extensive research involving thousands of people who own and work with animals, Sheldrake conclusively proves what many pet owners already know -- that there is a strong connection between humans and animals that lies beyond present-day scientific understanding. With a scientist's mind and an animal lover's compassion, Sheldrake compellingly demonstrates that we and our pets are social animals linked together by invisible bonds connecting animals to each other, to their owners, and to their homes in powerful ways. Sheldrake's provocative ideas about these social, or morphic, fields explain the uncanny behavior often observed in pets and help provide an explanation for amazing animal behavior in the wild, such as migration...
