

Analysis and design of rectangular microstrip patch antenna on different substrate materials in X-Band

By Ankit Ponkia

GRIN Verlag GmbH. Paperback. Condition: New. This item is printed on demand. 24 pages. Dimensions: 8.3in. x 5.8in. x 0.1in.Research Paper from the year 2014 in the subject Engineering -Communication Technology, grade: 10. 0, , course: Electronics and Communication Engineering, language: English, abstract: In this paper software based design and analysis has been carried out for a rectangular patch antenna using different substrate materials. A coaxial probe fed rectangular microstrip patch antenna operating at X-band (8 to 12 GHz) is analyzed on different substrate materials like Rogers RTduroid 5880, Rogers RTduroid 5870, Neltec NX9240, Arlon DiClad 522, and FR4epoxy. The design is analyzed by Finite Element Method (FEM) based HFSS EM simulator software. Return loss, VSWR plot, smith chart and radiation pattern plots are observed and plotted for all antennas. This item ships from La Vergne,TN. Paperback.

Reviews

This sort of publication is almost everything and taught me to hunting forward and much more. Yes, it is actually play, continue to an amazing and interesting literature. I am pleased to tell you that this is basically the best book we have read through inside my individual life and could be he finest book for ever.

-- Enrique Ritchie Sr.

The most effective ebook i possibly read. it was actually writtern quite completely and useful. I am just very happy to tell you that here is the best publication we have read through during my individual daily life and could be he greatest publication for possibly. -- Kennith Nicolas
