Createspace Independent Publishing Platform, United States, 2016. Paperback. Condition: New. Language: English . Brand New Book \*\*\*\*\* Print on Demand \*\*\*\*\*.Recently, Science has discovered that electrons can become entangled with one another. This means that the tiniest forces in the universe, some of which we use up as Electricity in our daily lives, is conscious behavior in some ways. This book is a call to the Scientific Community to learn more by performing an experiment we have designed and describe herein where electrons will show us if they indeed have the ability to Learn . If they can learn, the next question, we must ask ourselves is - what are they learning from us and what can we learn from them? In two earlier books - The 4 States of Consciousness and Uber Religion - Expletives Deleted , I discuss how and why humans have arrived at the greatest time in our civilization. Through the diligent efforts of our greatest scientific experiments - primarily with things like CERN S Large Hadron Collider where they discovered the God Particle - we are now profoundly aware of the Tinker-Toy manner in which all of the parts of our universe snap together. We also know from the classical double-slit experiment and recent experiments in Entanglements that electrons can be aware of one another s spin-state. In this new book, for the first time anywhere, I am putting forth the theory that since electrons are aware of our observations of them, and they can be aware of each other, then, they must also have the ability to learn. And, therefore, just as the US Navy has trained Dolphins to dive onto an enemy submarine and plant explosives on their hull, we may be able to train electrons to do even more wondrous things in...
