### Reviews

*This pdf is definitely not easy to get started on studying but quite entertaining to read through. I am quite late in start reading this one, but better then never. Once you begin to read the book, it is extremely difficult to leave it before concluding.*

Walker Company, United States, 2010. Paperback. Condition: New. Language: English . Brand New Book. Did lead pipes cause the fall of the Roman Empire? How many toilets were in the average Egyptian pyramid? How did a knight wearing fifty pounds of armor go to the bathroom? Was poor hygiene the last straw before the French Revolution? Did Thomas Crapper really invent the modern toilet? How do astronauts go in space? History finally comes out of the water-closet in this exploration of how people's need to relieve themselves shaped human development from ancient times to the present. Throughout time, the most successful civilizations were the ones who realized that everyone poops, and they had better figure out how to get rid of it! From the world's first flushing toilet invented by ancient Minoan plumbers to castle moats in the middle ages that used more than just water to repel enemies, Sarah Albee traces human civilization using one revolting yet fascinating theme. A blend of historical photos and humorous illustrations bring the answers to these questions and more to life, plus extra-gross sidebar information adds to the potty humor. This is bathroom reading kids, teachers, librarians, and parents won't be able to put down!.
