

## Basic Guide to Dental Sedation Nursing

By Nicola Rogers

John Wiley and Sons Ltd, United Kingdom, 2011. Paperback. Book Condition: New. 232 x 152 mm. Language: English . Brand New Book. Sedation is a procedure that makes use of sedative medications to produce a relaxed experience for the patient. The central nervous system (CNS) is affected through the use of drugs, including tranquilizers and anxiolytics, that can be administered to the patient in several ways. Sedation dentistry has several benefits, both for dentists and patients. For patients, it can mean freedom from anxiety or fear during dental procedures. In cases where a patient has not been able to undergo dental treatment for many years because of this fear, sedation dentistry allows him to have several years worth of dental treatment in just a few sessions. For dentists, sedation dentistry facilitates the easy performance of dental procedures. Patients are likely to be more cooperative under the relaxing effects of sedation. Treatments can also be quicker, because a number of procedures can be performed in a single session. Dental nurses play a vital role in assisting the dentist in the routine sedation of patients. In acknowledgement of this, the NEBDN run a post-qualification certificate in Dental Sedation Nursing that provides the...
