ROLE OF TENS IN THE MANAGEMENT OF RADIATION INDUCED XEROSTOMIA

Condition: New. Publisher/Verlag: Scholar's Press | Xerostomia is the symptom of oral dryness resulting from decreased salivary flow. The main causes of xerostomia are medications, radiation therapy of head & neck cancers & autoimmune disorders. Palliative treatments include topical agents, saliva substitutes. Systemic sialogogues like pilocarpine stimulate salivary flow but often have side effects. Transcutaneous electrical nerve stimulation (TENS) is a well-known physical therapy, which is useful for the relief of pain. Electrostimulation was studied in the past and showed...
