Univ Europeenne, United States, 2014. Paperback. Condition: New. Language: French . Brand New Book. Ce livre presente une analyse des formes et fonctions de l enseignement experimental de la digestion au sein du curriculum Tunisien. Le choix de la digestion n est pas arbitraire. En effet, une etude epistemologique et historique montre que la comprehension de la digestion a ete etroitement liee a des pratiques experimentales et a une approche analytique du vivant, necessitant l articulation d experiences in vivo et in vitro. L approche retenue est une etude curriculaire. Centree sur les problemes lies a la coherence, l organisation et le developpement des contenus d enseignement, l approche curriculaire presente un cadre pour analyser les formes et les fonctions des experiences, et leur coherence, dans le curriculum prescrit, potentiel et reel. Cette recherche a caracterise une diversite de fonctions accordees aux experiences et egalement certaines incoherences, internes et externes. Elle a mis en relief une centration de l enseignement experimental de la digestion sur des pratiques analytiques et chimiques et a degage differentes conceptions sur le vivant: analytiques, analytiques-biochimiques et analytiques totalisantes.
