By E E Fournier D Albe

Createspace, United States, 2015. Paperback. Book Condition: New. 229 x 152 mm. Language: English . Brand New Book ***** Print on Demand *****.This book differs from others dealing with the same subject, in that it is an endeavor to present, in a popular manner, the present state of our knowledge and the significance of the new theories of electricity and matter. The manner of presentation is not argumentative, as the facts, as they are now understood, are simply stated, no attempt being at first made to uphold them by mathematical analysis. In this the author is most successful, and there should be little difficulty to those interested in the subject in following him. The origin and development of the electron theory are first presented, and the bearing of this considered, first as regards the electron, next the electric discharge, thermo, voltaic and dynamic electricity, magnetism, induced currents and radiation. Then the author takes up the measurements which have been made, and upon which the theory as presented has been based. The relations of this theory to light, magneto optics and radioactivity are discussed. In this study the author has been impressed by the opportunity of simplifying the dimensions of electrical...
