The success of benchmarking as an evaluation technique, however, depends upon the extent to which benchmarks can be constructed that are representative of expected, future workloads. The immediate purpose of this Guideline is to describe a step-by-step procedure for the construction of benchmarks for use during the competitive acquisition of adp systems which support batch and/ or online workloads. This Guideline identifies the best practices found within private industry and the Federal Government with respect to benchmark construction. Detailed guidance is given when possible and where appropriate. In some areas, few established practices exist, thus treatment of these areas will be more general. The ultimate purpose of this Guideline is to help reduce the cost of the often lengthy benchmark construction process in the Federal Government, while also helping agencies construct representative benchmarks, and, indirectly, helping to reduce the vendors time and...
