University of California Press, United States, 1998. Paperback. Condition: New. Reprint. Language: English . Brand New Book. Los Angeles has grown from a scattered collection of towns and villages to one of the largest megacities in the world. In the process, it has inspired controversy among critics and scholars, as well as among its residents. Seeking original perspectives rather than consensus, the editors of *The City* have assembled a variety of essays examining the built environment and human dynamics of this extraordinary modern city, emphasizing the dramatic changes that have occurred since 1960. Together the essays--by experts in urban planning, architecture, geography, and sociology--create a new kind of urban analysis, one that is open to diversity but strongly committed to collective theoretical and practical understanding.
